

PERSON OF INTEREST

Wynyard's Person of Interest solution combines the power of advanced crime analytics and targeted case management, enabling agencies to proactively manage offenders, protect victims and prevent serious crime.

Wynyard's Person of Interest solution is a configuration of the Wynyard Advanced Crime Analytics Platform.

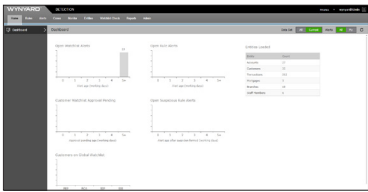

PERSON OF INTEREST IS USED BY:

-  LAW ENFORCEMENT
-  JUSTICE AND CORRECTIONS
-  NATIONAL REGISTERS

PERSON OF INTEREST HELPS:

- Identify, monitor and manage persons and populations of interest.
- Share relevant information between teams and agencies to coordinate crime prevention and victim protection strategies.
- Develop a comprehensive risk framework and take action in response to any changes in risk levels.
- Oversee programs with user customisable dashboards, reporting tools and automatic alerts.

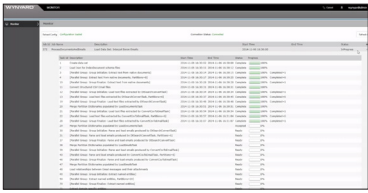

SOLUTION HIGHLIGHTS:

Integrated reporting and dashboards
User configurable dashboards give managers visibility of the risks in real-time, so they can examine areas of concern, take action as well as accurately report.

Comprehensive POI register
Build profiles of individuals and people at risk by developing a picture of the person, their environment and associates.

Combine systems and data sources
Fuse multiple sources of internal and external data to gain a single-view of a person of interest and then use the powerful search and query capabilities to retrieve information from these systems.

Advanced analytics and visualisations
Use advanced analytics such as data mining, link analysis, anomaly detection, identity resolution, and prediction capabilities to help users better manage the environment.

Wynyard Person of Interest is designed to help identify, monitor and manage persons and populations of interest
